TERRA VERA

DIRECTIONS

Empty entirety of NUTRI pack into 5 gallons of liquid to be applied foliarly to the plants. Stir the solution until the solid has completely dissolved. Dilute the Resulting Solution with water at the rates below. For example, a 3:1 dilution is 3 equal parts water plus 1 equal part Resulting Solution.

| Living Plant Life Stage | Water: Resulting Solution | Application Method |
|--------------------------|---------------------------------|-----------------------|
| Propagation - Clone/Seed | 3:1 | Spray/Fog/Soak |
| Vegetative weeks 1/2 | 3:1 | Spray/Fog |
| Vegetative weeks 3/4 | 3:1 | Spray/Fog |
| Flower weeks 1-4 | 3:1 | Spray/Fog |
| Flower weeks 5-8 | 2:1 | Spray/Fog |
| Week of Harvest | 2:1 | Spray/Fog |

Diluted solution can be used in conjunction with a non-ionic surfactant and be applied with any sprayer or fogger (preferably ULV). It can be applied using a hand-held sprayer, a ground sprayer, aerial equipment, or sprinkler irrigation equipment. Sprayed surfaces or plants should be thoroughly wet, and sprayed surfaces should be allowed to dry without wiping. ALWAYS FOLLOW SPRAY/FOGGING EQUIPMENT AND SURFACTANT GUIDELINES AND INSTRUCTIONS.
